Full-Stack Web Developer (Freelance / Personal Projects)

Jan 2024 - Present

Real-Time Chat Application:

- Engineered a high-performance instant messaging platform utilizing the MERN stack (MongoDB, Express, React, Node.js).
- Implemented bi-directional, real-time communication using Socket.io for instant message delivery and synchronization.
- Designed a responsive, modern UI with Tailwind CSS and managed complex global states on the frontend efficiently.

Premium Web Platform Application:

- Developed a high-performance web platform utilizing React.js and a robust full-stack architecture.
- Optimized complex backend APIs, data flows, and state management, significantly improving application load times and rendering speed.
- Focused on creating clean, maintainable code architectures and deploying production-ready features.
